

Photography Boot Camp

Siesta Key - July 13th, 14th & 15th. 2012

This total immersion workshop is designed for those who really want to advance their knowledge of the photographic, imaging processes. The three day workshops are packed with classes and photo shoots, in a planned succession, created to allow you to apply in the field, what you just learned in the classroom.

If you don't normally have time to go to classes during the week, this accelerated learning experience provides an excellent opportunity to attend several classes in a short period of time. Boot Camp is designed to compress the learning experience, saving valuable time. You might even get a room on the Key for a fun and educational get away, a retreat at the beach.

The location was chosen to give our students a chance for a short vacation in a location with numerous subjects for photo opps. Those who live further away can now take more than our normal two hour classes and make the trip well worth while. Photographic locations have been chosen to give you a wide range of subjects - from beaches, wildlife, Florida style architecture, sunsets and much more.

If you reserve for the whole weekend before 6/30/12, the cost is \$300. If booked after 6/30, cost for the Boot Camp will be \$400. We recommend that you book ASAP! This is a very popular and FUN photographic learning experience.

In order to accommodate students who cannot join us for the total weekend, we will offer a one day pass for \$150 or a 1/2 day pass for \$100. Don't miss out on any aspects of the weekend if you can possibly help it. Add \$10 for any class that uses a model.* This fee does not include a release for Internet use, but does allow limited use. An Internet release may be available, depending on the model
