

ANNA MARIA ISLAND WORKSHOP RETREAT

July 27, 28, 29 Anna Maria Island Workshop Retreat

In July, James presents his much acclaimed Anna Maria Island Workshop Boot Camp.

This total immersion workshop, is designed for those who really want to advance their knowledge of the photographic, imaging processes.

This three day workshop is packed with classes and shoots, in a planned succession, created to allow you to apply in the field, what you have just learned in the classroom.

If you don't normally have time to go to classes during the week, this accelerated learning experience, provides an excellent opportunity to attend several classes in a short period of time, designed to compress the learning experience, into a just three fun-filled days.

You may want to plan on getting a room on the Island, for a fun and educational and get away, a photographic retreat.

Photographic locations, such as Cortez Fishing Village, Bridge Street, the Old Bridge, colorful old Florida style architecture, beautiful beaches and wildlife all lend themselves to great photographic possibilities.

Along with the great locations we have put together a program designed to bring you up to date on producing quality Digital Images.

In order to accommodate students who cannot join us for the total weekend, we will offer a one day pass for \$150 or a ½ day pass for \$100. Don't miss out on any aspect of the weekend if you can possibly help it. (add \$10 for any class that uses a model) This fee does not include a release for internet use, but does allow limited use. An internet release may be available, depending on the model.
